Mr. Nigel Robinson
Remedial Project Manager
United States Environmental Protection Agency
290 Broadway
New York, New York 10007-1866

Dear Mr. Robinson,

In lieu of a meeting, please clarify the following issues to follow up on your conversation with Alexandra Belinky yesterday.

Soil

Please provide specifics about the sub-surface contamination remaining onsite, including the number and location of the current deed restrictions.

Groundwater

Please specify the current number of monitoring wells and extraction wells onsite, as well as the total number of wells projected to be onsite when the Remedial Design plan is implemented. Please provide the timeframe for which these wells and the wastewater treatment system will need to stay in place to contain the contaminated groundwater onsite. Finally, what are the contaminants of concerns for which the groundwater is being treated?

Future Redevelopment

Has a designated redeveloper been chosen for this site? Who holds the deed to the property? Is the PRP funding any proposed redevelopment at this time?

Sincerely,

Robert Spiegel
Executive Director
Edison Wetlands Association
